3D view

Features

Minimize solder and flux splash

Cutting a V-groove on the solder surface enables the release of gas pressure generated by the flux, thereby suppressing splash. The HAKKO 375 can cut a groove in only the solder needed, then helps to reduce the level of defectiveness.

Advantages of V-grooved solder

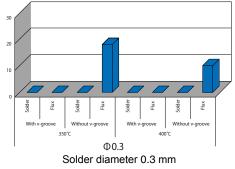

-Examination of solder and flux splash

Test criteria

Measurement method	Measure the amount of solder and flux splashing after solder is fed to the soldering iron
Temperature setting for soldering iron	350°C and 400°C
Solder	Lead-free (Sn-3Ag-0.5Cu) Halogen-contain in flux and halogen-free flux ø0.3 mm and ø1.0 mm
Solder feed length	50 mm

* The effect of solder and flux splashing prevention may differ under different operation conditions.

Soldering Iron Thermometer

- Tip thermometer that provides reliable temperature control of soldering iron tips
- Compact design minimizes your workspace and enables you to easily carry it around.
- Incorporating an extremely fine sensor that has high temperature reactivity.

SOLDERING TESTER FG-101

Soldering Iron Tester

- Tip temperature, leak voltage, and tip-toground resistance can be easily measured with high accuracy.
- Soldering iron tester useful for daily
 maintenance of station-type soldering irons

What is leak volatage and tip-to-ground resistance?

Leak voltage

Leak current is the current that leaks from the tip to a board or device. Leak voltage is a specific measurement of the level of this current. The leakage can adversely affect delicate

devices, so it is necessary to check leak voltage on a daily basis.

Tip-to-ground resistance

Most leak current flows from the tip via the ground wire to the outlet ground terminal, and is prevented from affecting the device. Because of this, tip-to-ground resistance is another important issue that must be checked daily.

Common features of FG-100 and FG-101

Dimensional measurement

MAX HOLD function

When the "MAX HOLD" button is pressed, "MAX HOLD" is displayed and the highest tip temperature is held on the display.
